BRIEF DESCRIPTION:

World Radiology Day (WRD) marks the anniversary of the discovery of x-radiation, by Wilhelm Roentgen in 1895. Each year on November 8, radiology professionals around the world celebrate our vital contribution to modern healthcare by promoting the profession and raising public awareness of our important work. As professionals, we make a difference because we understand the cornerstone of the principle of radiation protection for our patients is Justification and Optimization. The event started with a welcome and an introductory speech by Dr. Hema G, Professor of Oral medicine and Radiology department. A motivational speech on the importance of dental imaging in maxillofacial diagnostics was given by Dr. Ravindra SV, vice principal and head of the department of oral medicine and radiology. Quiz, elocution and dumb charades were conducted simultaneously. The participated students showed full zeal and enthusiasm in all the competitions. Prizes were given for the winners.

ATTENDANCE:

Staff members of oral medicine and radiology and other departments, PG students of Oral medicine and Radiology, Under Graduate Students.

CONCLUSION:

Main purpose of celebrating the world radiology day is to raise the public awareness of radiographic imaging and radiation therapy for maxillofacial region which plays an important role in diagnosis and treatment planning of the patient.
